

Singapore

Postcode

Postcode type and position

6 digits to the right of the locality

Coding method

5 4 6 0 8 0

Address format

The six-digit postcode was introduced on 1 September 1995 to replace the four-digit postcode. It enables a unique postcode to be assigned to every house and building in Singapore.

The floor and apartment number are included in addresses in the following format:
13-37 (13th floor, apartment 37).
